

SPOTLIGHT ON: KATZ

Supreme style

Katz offers luxurious interior design with a personal approach

Katz has a 20-year heritage of delivering exceptional results within the luxury property sector. Its wealth of experience continues to grow through prime residential and prestigious hospitality and retail projects. Born out of the philosophy and experience of its founders Dmitry Holomyov and Stan Katz, the practice has become one of the most successful companies in its field. “We have grown the company from the production of interior elements and furniture to the creation of interior designs for private homes, hotels and clubs, jets, yachts and other premium complexes in the most prestigious areas around the world,” says Dmitry Holomyov.

LONDON DESIGN

London is “the centre of design”, believes Holomyov. “Among industry professionals, there is even a term in common use – ‘London’s design’. The main difference is that clients in London prefer custom designs rather than leading branded elements. This indicates a desire to personalise your apartments, to make them truly unique,” he says.

PERFECT PREPARATION

Before working with a client, the practice conducts a lengthy brief and prepares a mood board to understand their true desires, so that the overall vision and concept always matches the client’s expectations. Katz’s uniqueness lies in creating turnkey projects. “The client moves into a finished apartment, complete with accessories, down to the robe and slippers,” explains Holomyov.

UNIQUE APPROACH

When implementing any design, more ideas are born in the creative process. “We always want to improve, to think of something better,” explains Holomyov. The resulting designs turn out to be absolutely unique, and an international team of specialists and contractors are brought in to implement what are often highly complex schemes. It is a challenge they enjoy and success is always guaranteed. ■
